

## Directions for Mounting | Project 1 & 2 | Surrealism and Self Portrait

1. Digital files 8" x 10" at 300 PPI
2. Board 11" x 14" (2 boards, one for each piece)
3. Printer paper high quality ink jet if printing on an ink jet printer. Kinko's or other commercial printers use the best quality paper available. You could also get a large size photographic print.
4. Cut the prints out using an sharp Xacto knife and a steel rule.
5. Leave 1/4" white border around the edge of each print.
4. Mount projects accurately so that there is an even amount of space around each side, the bottom should have slightly more space. Use spray glue (I recommend 3M Super 77).
5. Place a label on the back of each board that has name, Name, e-mail address, project name, Art 149 and Spring 10
